ABSTRACT

This collection of statistical data on school library media programs for 1997-98 is designed to assist local education agencies (LEAs) in examining their library media collections and staff according to the recommendations in "Standards for School Library Media Programs in Maryland." Tables present the following data by public school LEA or county: staff totals; number and percent of schools meeting staffing standards; collection totals; number of schools meeting collection size standards; nonfederal expenditures for library media materials; technology services; computer lab/reference services; television services; instruction/scheduling; central system staffing; central services; system level collection totals; system level technology services; system level computer lab/reference services; and system level television services. Information on library media centers in non-public schools is also provided related to technology services, computer lab/reference resources, television service, scheduling, staff totals, and collection totals. A list of Maryland State Board of Education members and selected State Department of Education staff is included. (MES)

Non-Public School Library Media Report 18

INTRODUCTION

This collection of statistical data on school library media programs is designed to assist local education agencies in examining their library media collections and staff according to the recommendations in *Standards for School Library Media Programs in Maryland.* Information on library media centers in nonpublic schools is also provided as reported by them.

The data for this document was secured from the Annual Library Media Center Reports:

MSDE FORM Public 0203 12/97
MSDE FORM Nonpublic 0203 12/97
MSDE FORM System Level 0203 12/97

Data in this report was compiled and prepared by Gail Bailey, Branch Chief, School Library Media Services, Jayne Moore, School Library Media Specialist, Pam Genco and Donna Erb, Administrative Aides. Treva Stack, Research Statistician, University of Baltimore, cooperated with School Library Media Services to analyze statistical data.

MARYLAND SCHOOL LIBRARY MEDIA

SUMMARY

1997-1998

- There are 830,744 students in Maryland's 1,297 schools served by 972 certified school library media specialists and 142 non-certified library media specialists. Only 682 schools meet Maryland's professional staffing guidelines for school library media programs. Only 362 schools meet clerical and technical staffing guidelines for school library media programs.

- Approximately one-half of the local school library media programs are administered by certified school library media administrators.

- 16.9% or 214 schools meet collection standards as outlined in Standards for School Library Media Programs in Maryland.

- Budgets for school library media materials are being stretched to purchase electronic resources as well. Average per pupil expenditures for school library media materials range from 92 cents in one county to $19.34 in another. Because of site-based management in some school systems, not every school library media center receives the same amount of funding within a county, thus creating inequity even within individual systems.

- 72% of the schools responding to the 1997-1998 MSDE Technology Inventory reported that the library media specialists are involved in the support and maintenance of school equipment and networks.

- 81.1% of our library media centers have access to Sailor, Maryland's Online Information Network, and the Internet.

- While 73.7% of school library media centers have automated circulation systems, only 52.6% have automated online public access catalogs.

- Almost 50% of school library media specialists are involved with school improvement efforts by serving on their School Improvement Teams.

Investing in the school library media program supports all content areas on every grade level.
